### Byers Peak Installs Central Water Purification System

**Wheat Ridge, CO, December 10<sup>th</sup>, 2008-----**Byers Peak, Inc. today announced the installation of a Central Water Purification System (CWP) to help facilitate wet testing of medical, biotech and industrial products. The CWP, along with additional capital investments, provides Byers Peak with the capability of RO and DI water delivery to the manufacturing floor.

“This investment increases our ability to support our customers wet test requirements and mitigating their startup costs for products that require water filtration” said Phil Prescott, President, Byers Peak.

“Often you hear about contract manufacturers are adding SMT lines or cabling capabilities”, said Jake Rost, VP Business Development, Byers Peak Inc. “Our investment in the CWP system strengthens our niche as a contract manufacturer of complex fluidic devices and continues to differentiate us from traditional electronic service providers”.

### About Byers Peak

Byers Peak is a leading contract manufacturer of low to medium volume, complex medical, biotech and industrial instrumentation devices. Our technology strengths in manufacturing, engineering, assembly and field service includes fluidics, pneumatics, RF, electronics and systems integration. We are ISO 9001:2000 and ISO 13485:2003 certified, and GMP/QSR compliant.
